Each of the new stations on the line will have space for a heritage board and custom designs in the Corten steel fencing. It has been decided that the content and design of these spaces will be influenced by communities local to the area.

## Objectives

- A greater range of residents engaged with the Camp Hill Line development.
- Embed the station within the local community.
- Continue to develop a strong sense of local identity within each station.
- Engage with local venues, special interest groups, resident groups, parent toddler \& support groups.

## Material Examples

Cycle Racks

Benches and Seating
